Subject: Wright County Iowa Transfer Station Fire and Corn LP		
<u>Summary of Communication:</u>  Mike Link, 515-450-2342, is an insurance adjuster for Wright County, Iowa. Last week the solid waste transfer station in Clarion burned down. Mr. Link suspects a load of fly ash, wet cardboard, and egg crate pulp caused the fire. There was one to two tons of the fly ash in the load. It came from Corn LP, an ethanol plant in Wright County. The load was smoldering when it came out of the truck. They thought they put out the fire, but he suspects that washing down the inside of the building got the fly ash wet again and caused it to start burning again.  I asked if there were any wastes from biodiesel production in the transfer station and he said no.		
<u>Conclusions, Actions Taken or Required:</u> We will ask ENSV to conduct an investigation of this fire and inspect Corn LP.
